

SkyView Pilot's User Guide Errata

December 4, 2009

Scope

This end user documentation errata applies to the SkyView Pilot's User Guide (101321-000, Revision A) and should be used in conjunction with the guide for a complete functional description of SkyView.

Check downloads.dynonavionics.com for the latest version of SkyView firmware.

Errata

GPS Assist

Page 2-3 of the SkyView Pilot's User Guide describes the GPS Assist feature. This feature is not currently implemented in SkyView. It will be added in a firmware update scheduled for release during January, 2010.

SkyView Display Synchronization

The SkyView Pilot's User Guide describes in-flight settings adjustment (e.g., barometer setting and bugs) behavior as it is intended to function. The behavior that is described in the guide assumes that networked SkyView displays are synchronized.

At this point in time, SkyView displays are not automatically synchronized. Because of this, barometer setting and bugs must be adjusted on each display.

SkyView display synchronization will be implemented in a firmware update that is scheduled for release during January, 2010.
